Unit Two: Developing
Base Ten Number
Sense

SAMPLE:

Name: _____

Button, Button!

How many buttons would your teacher need to buy to replace all the buttons in your class?

STRATEGIES FOR
TEACHING AND
LEARNING —6th Grade

Computation with fractions is best understood when it builds upon the familiar understandings of whole numbers and is paired with visual representations. **Solve a simpler problem with whole numbers, and then use the same steps to solve a fraction divided by a fraction.**

Looking at the problem through the lens of “How many groups?” or “How many in each group?” helps visualize what is being sought.

For example: means “How many groups of three would make 12?” Or, “How many in each of 3 groups would make 12?” Thus can be solved the same way. “How many groups of make ?” $312 \div 4127 \div 41$
27

Creating the picture that represents this problem makes seeing and proving the solutions easier:

Georgia Standards of Excellence (GSE)

On February 19, 2015, the State Board of Education (SBOE) voted to rename the ELA (English Language Arts) and Mathematics standards to the Georgia Standards of Excellence (GSE). The revised State Board of Education approved ELA and Mathematics standards for implementation which began in the 2015-2016 school year is called the ELA and Mathematics Georgia Standards of Excellence (GSE).

Georgia Performance Standards

The performance standards provide clear expectations for instruction, assessment, and student work. They define the level of work that demonstrates achievement of the standards, enabling a teacher to know "how good is good enough." The performance standards isolate and identify the skills needed;

- To use the knowledge and skills to problem-solve,
- To reason,
- To communicate, and
- To make connections with other information.

They also tell the teacher how to assess the extent to which the student knows the material or can manipulate and apply the information.

3RD GRADE MATH SAMPLE

Happy to Eat Healthy

1. Cut out the snack items from the Healthy Snack List.
2. Find a combination of 3 or more items that you can purchase with \$2.
3. Glue the snack items you chose to the bottom or back of this page. Snack items can be used more than once.
4. Show all of your work.
5. Show your answer in the table below. Be ready to explain how you arrived at your answer.

Apples = 52 ¢

Raisins = 56 ¢

Popcorn = 49 ¢

Hot dog = 75 ¢

What does a performance standard contain?

The performance standard incorporates the content standard, which simply tells the teacher:

- what a student is expected to know (ie.,
- what concepts he or she is expected to master).

Additionally, it adds to these concepts by providing three additional items:

1. suggested tasks,
2. sample student work, and
3. teacher commentary on that work.
